

RAVOLUTION

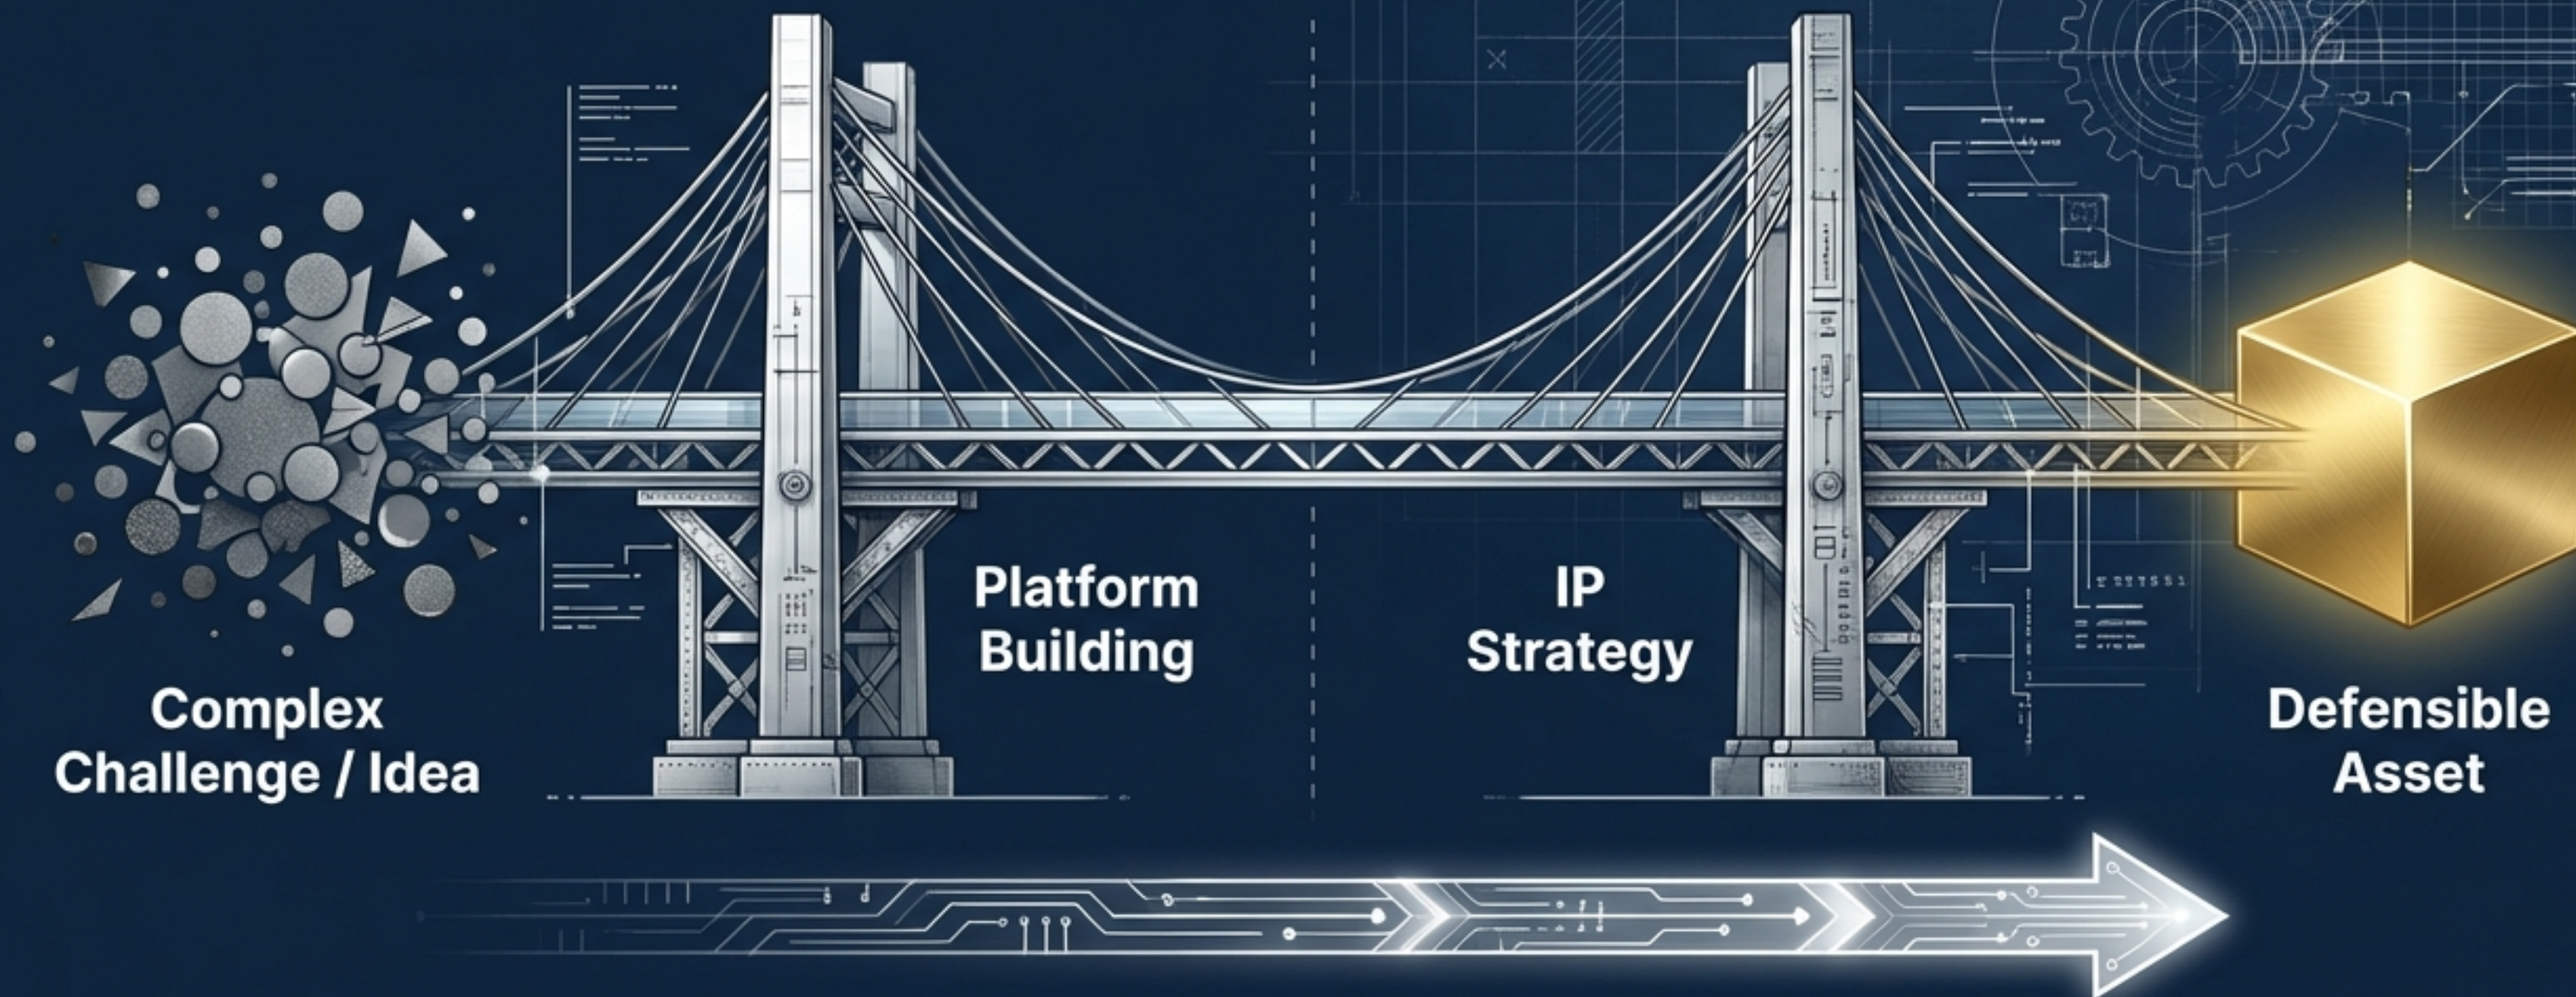

Industry-Grade Platform Development for Defensible Innovation

Tech Development & IP Innovation

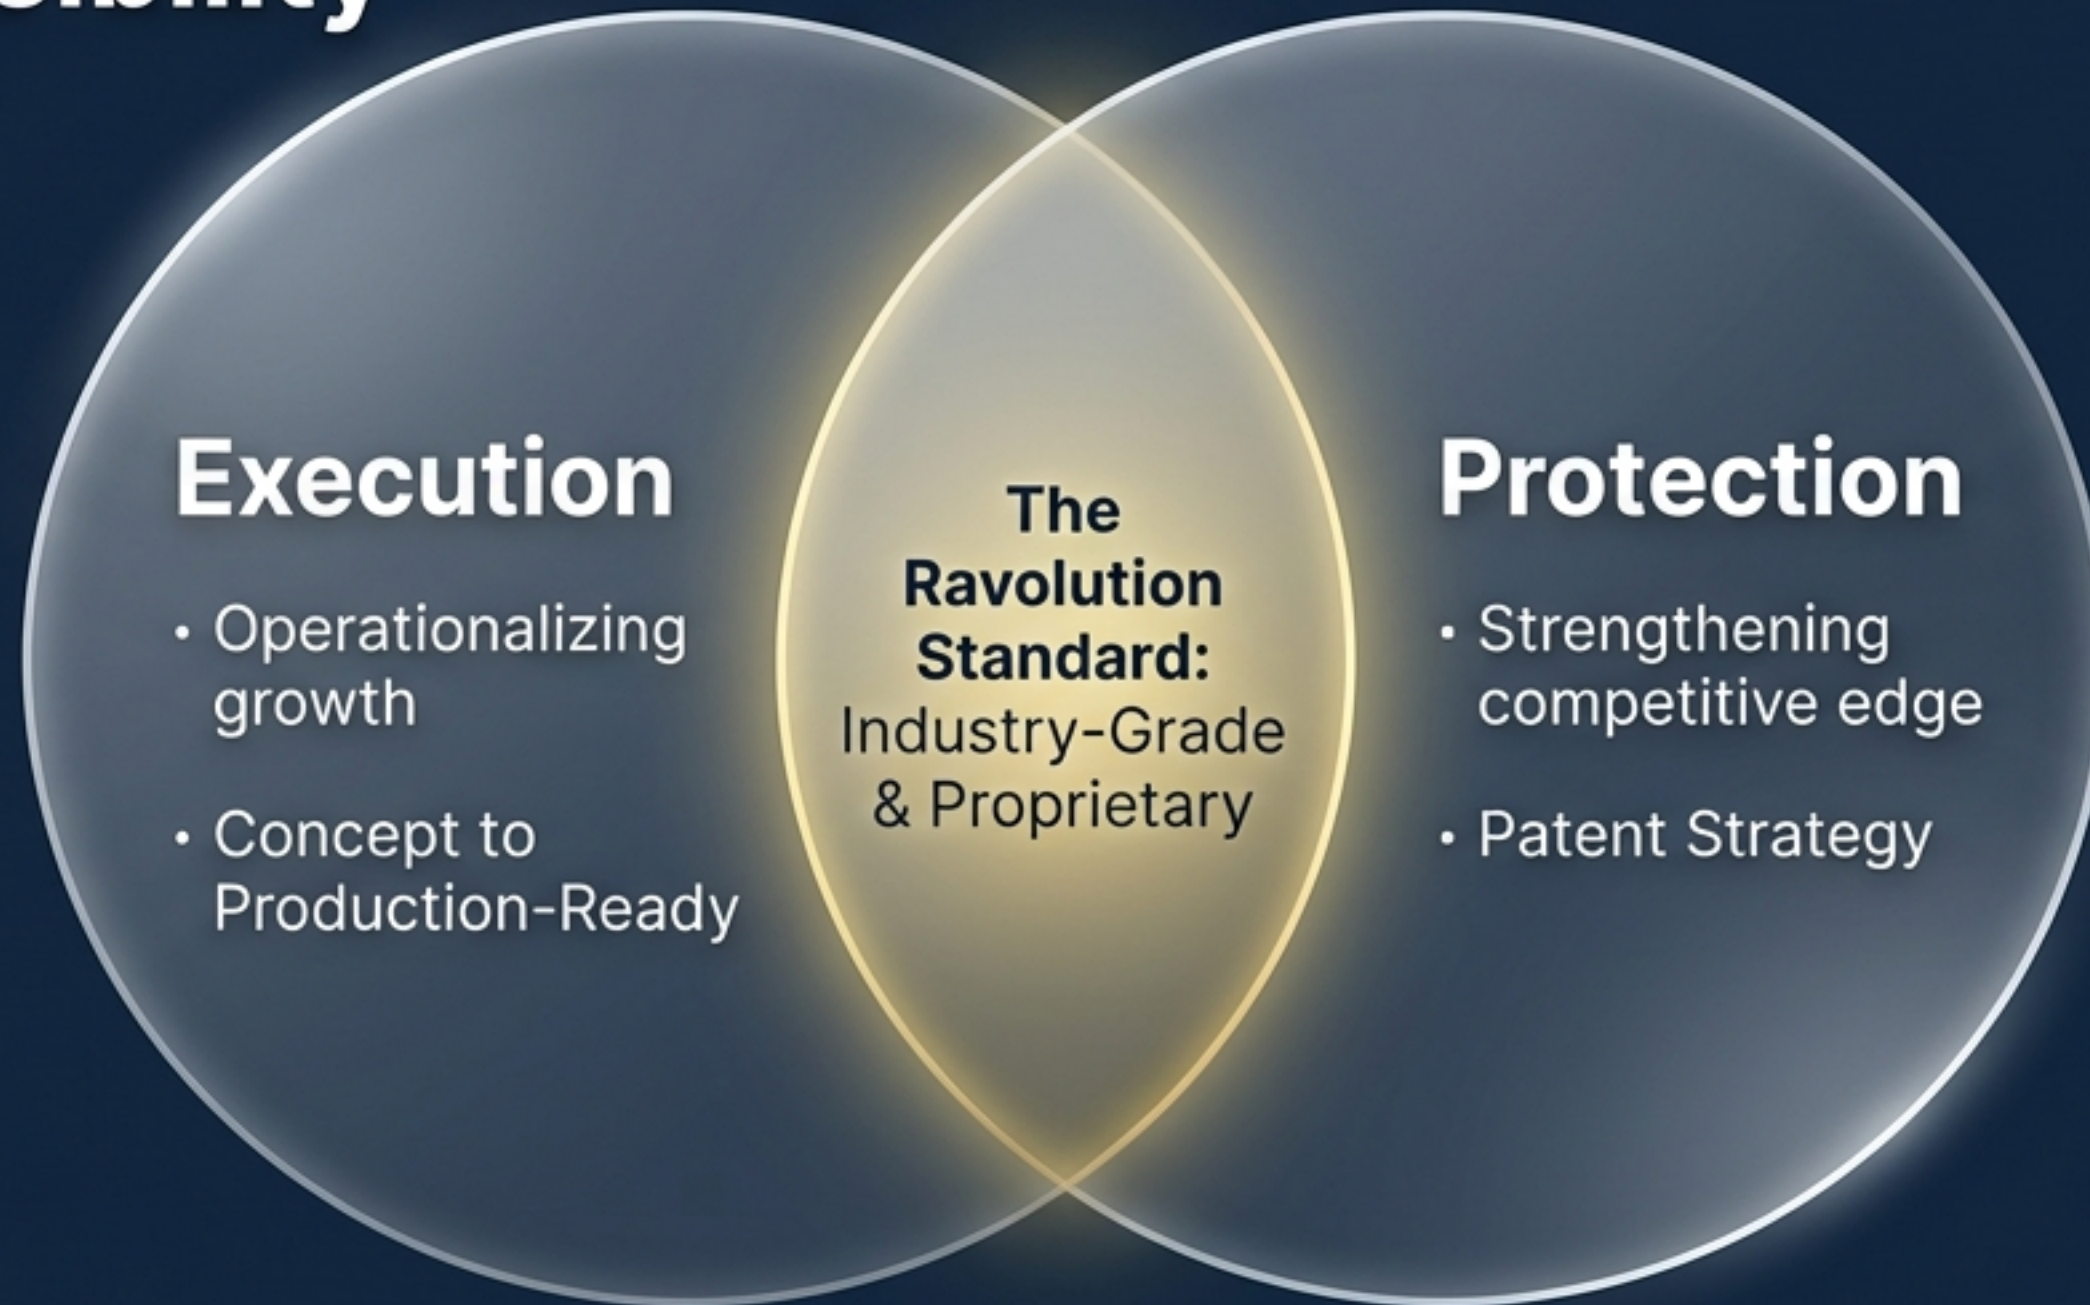

Led by Ivan Daza, Digitalization Expert & Platform Builder

Converting Complex Challenges into Protected Assets

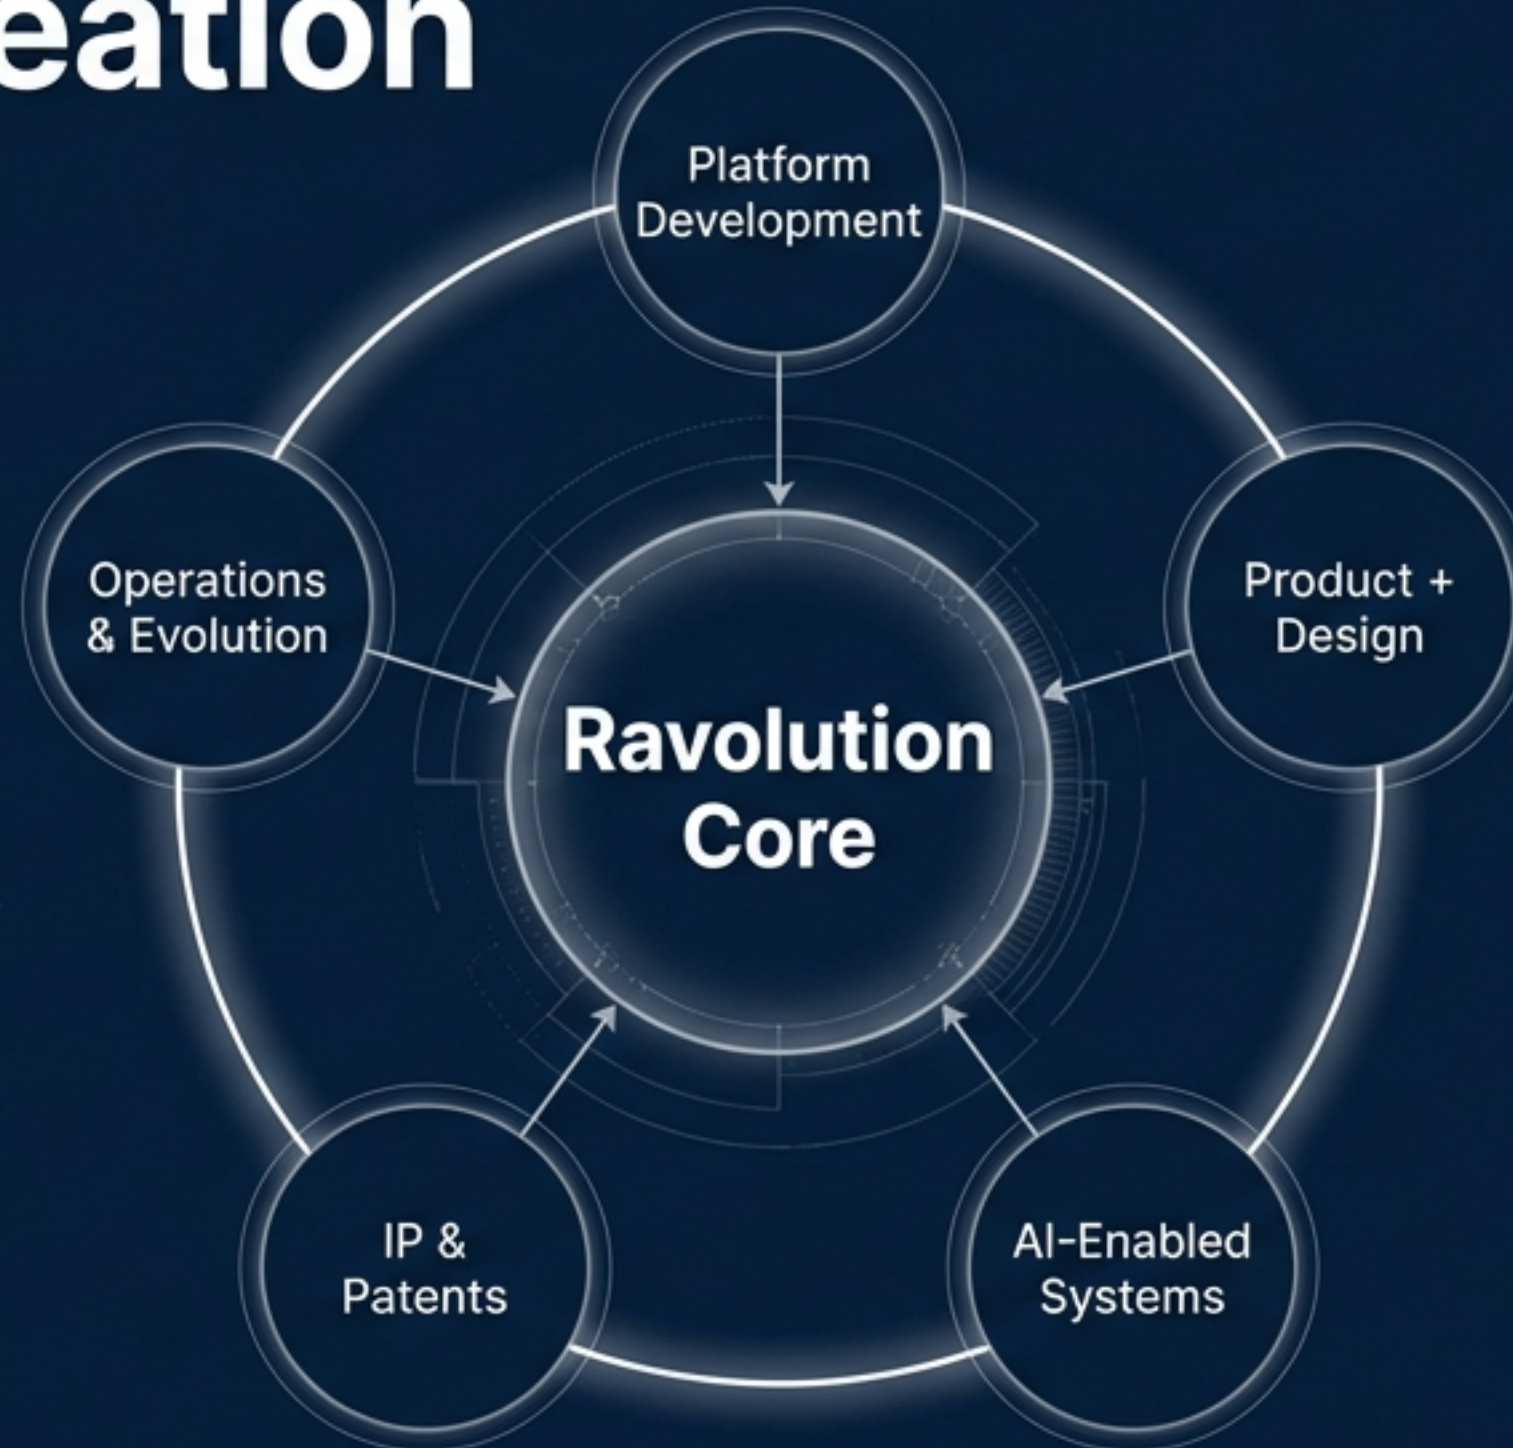

We don't just build; we protect. We combine execution with patent support to ensure your innovation remains your competitive edge.

The Intersection of Usability and Defensibility

Innovation without protection is vulnerability. We ensure your platform operationalizes growth while securing your long-term advantage.

A Holistic Ecosystem for Digital Product Creation

We do not view these as isolated tasks.

Design informs IP; AI informs Operations. This is a unified approach to building.

Engineering Tailored Business Logic

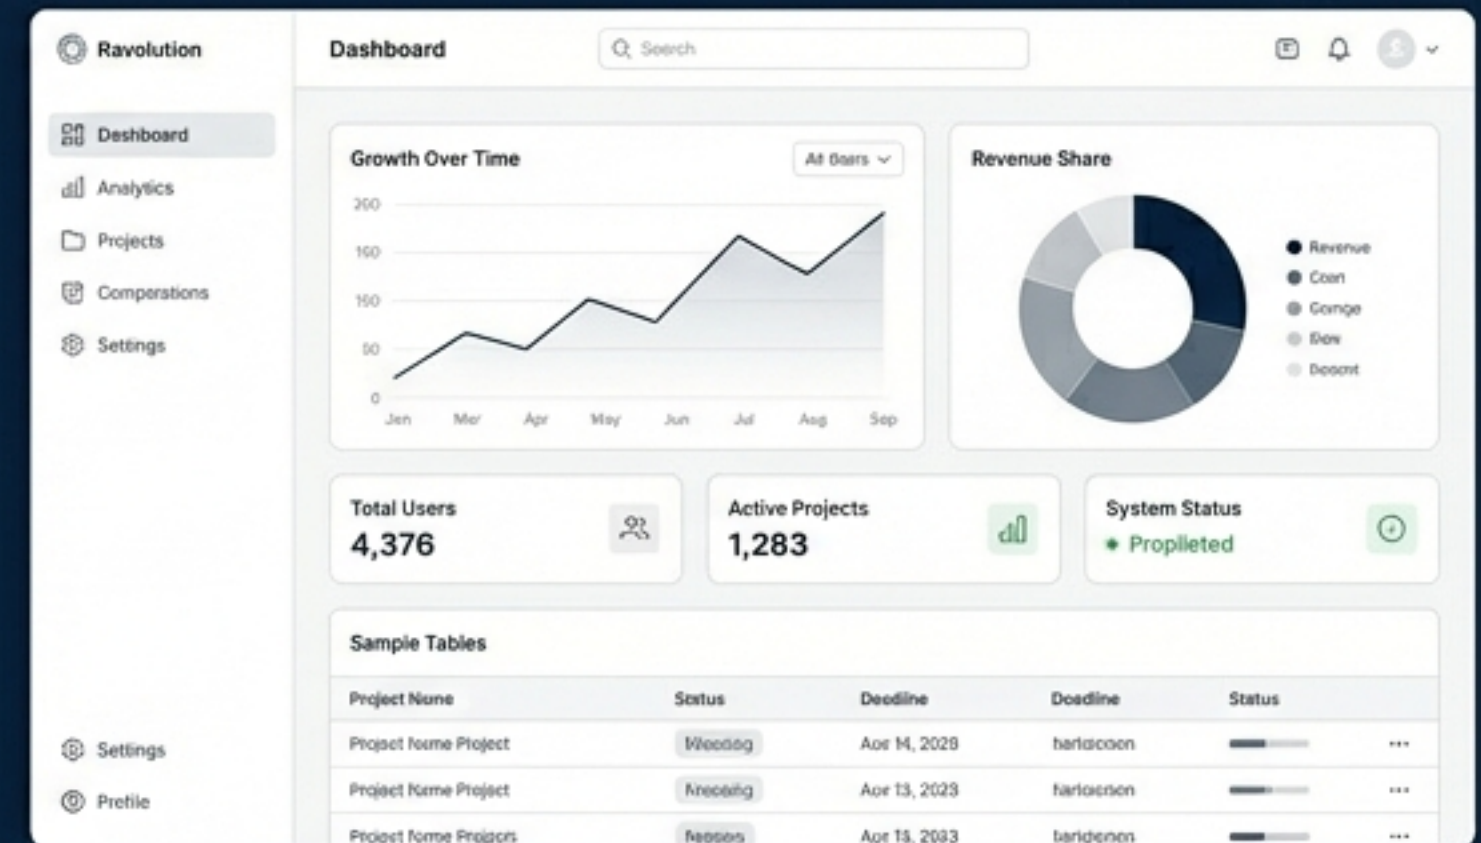

Platform Development

- Tailored CRM, partner portals, marketplaces, and trade platforms.
- Systems aligned with your business logic, not forced into existing constraints.

Product + Design

- Moving from concept to production-ready solution.
- Strong focus on usability and real-world implementation.

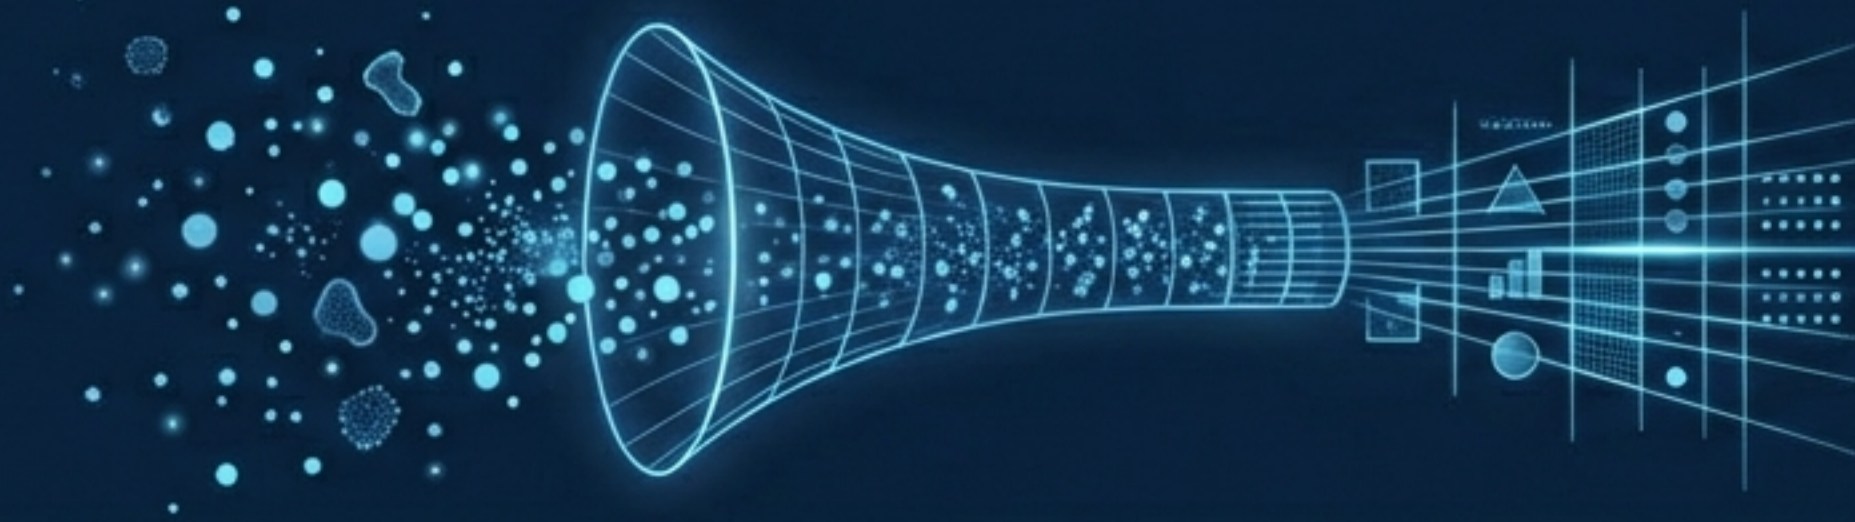

We avoid generic templates. We build specialized platforms that fit your specific processes.

Intelligent Systems and Continuous Evolution

AI-Enabled Systems

AI where it creates measurable value: qualification flows, summarization, structured decision support, and content operations.

Ongoing Operations & Evolution

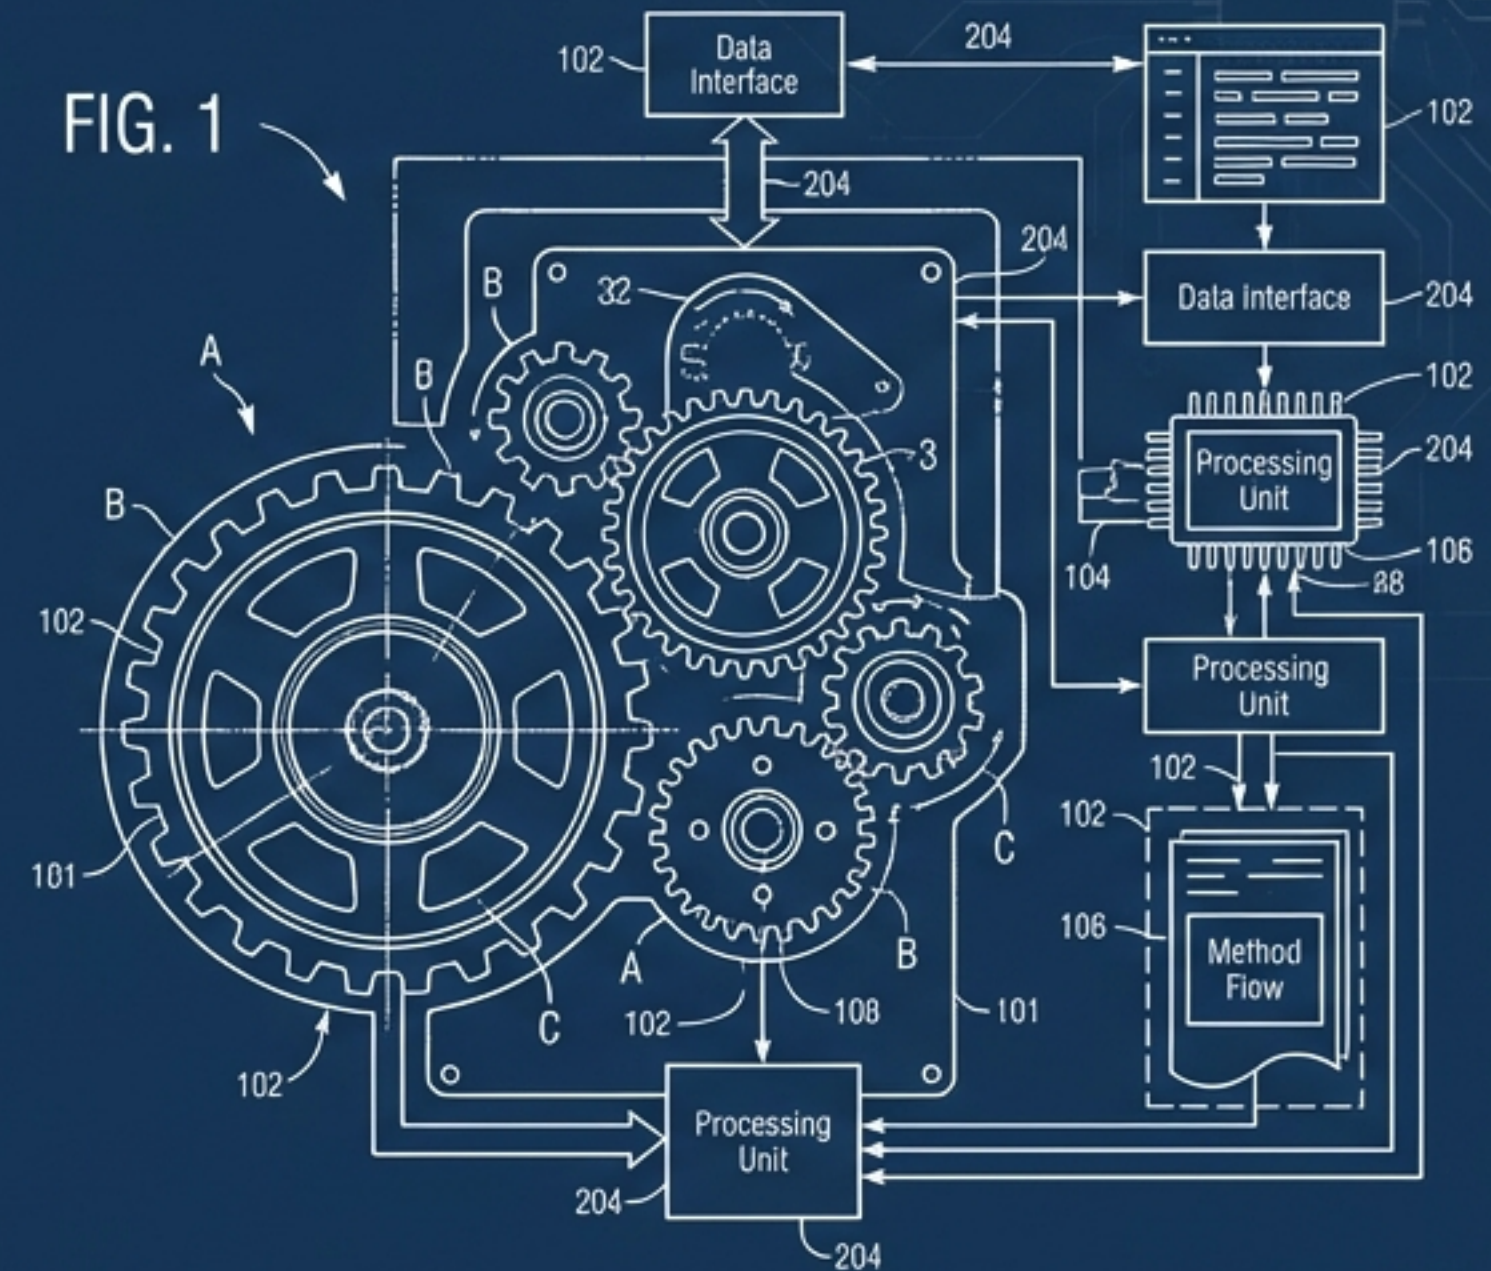

Continuous management and optimization ensuring the platform keeps delivering over time.

Turning Methodologies into Intellectual Property

IP & Patents

- Support with patent strategy and patent applications.
- Protect key methods and systems to create a competitive edge.
- Strategic Insight: An IP plan connects product differentiation with defensibility and long-term advantage. It transforms a software tool into a capital asset.

Measurable Outcomes and Strategic Advantage

Specialized Platforms

Solutions that fit your processes rather than generic templates.

Scalable Workflows

Clear data structures that make complex operations measurable and repeatable.

Global Readiness

Structured digital workflows to support cross-border trade and partner-driven go-to-market.

Defensibility

An IP plan that secures long-term competitive advantage.

RAVOLUTION

The Ravolution Venture Portfolio

We practice what we preach. Our portfolio demonstrates our ability to apply our methodology across diverse sectors.

iApply™

Transparent Recruiting

CommunicatingSchool™

K1–K9 Equity in Learning

Rosetta Livingstone™

Language Learning

xPortMatch™

AI-Driven Borderless Trade

Solving Complexity in Trade and Talent

xPortMatch™

AI-Driven Borderless Trade

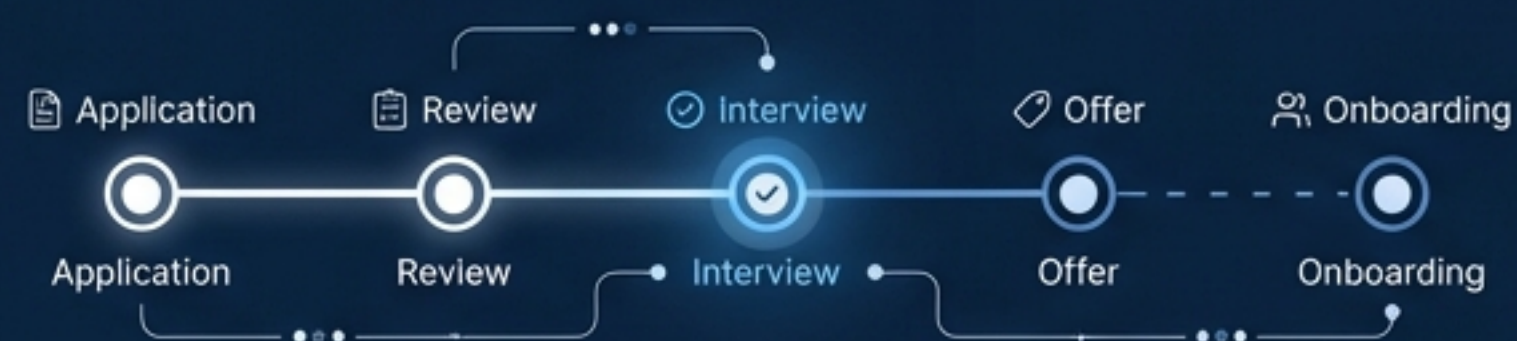

Automating complex cross-border workflows.

iApply™

Transparent Recruiting

Building trust through clear process visualization and data transparency.

RAVOLUTION

Platforms for Learning and Equity

CommunicaringSchool™

K1–K9 Equity in Learning

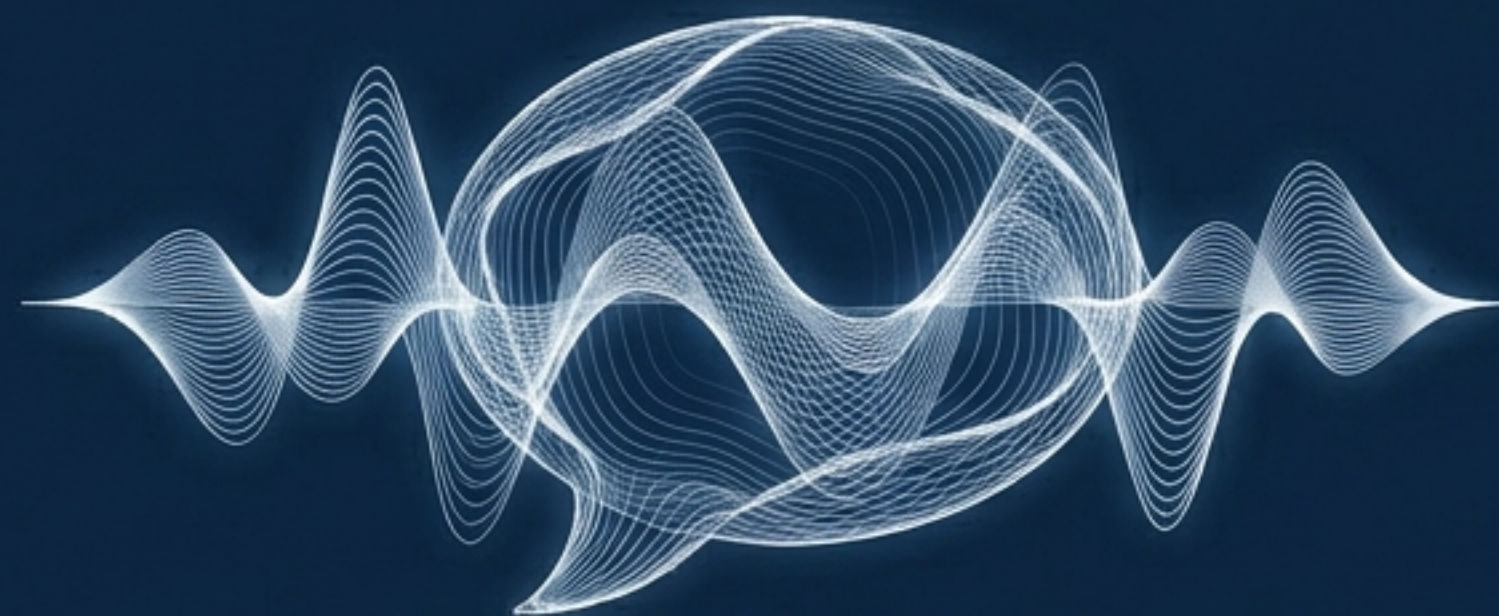

Operationalizing educational equity through digital tools.

Rosetta Livingstone™

Language Fluency

Facilitating complex cognitive skill acquisition.

Partnering for Strategic Innovation

We partner with forward-thinking organizations.

- ✓ Strategic innovation architecture
- ✓ Patent strategy implementation
- ✓ Complete, industry-grade platform architecture

We are not just a dev shop. We are your partners in building a defensible future.
